EDUCATION

• Monolith Research and Training Labs Pvt Ltd	2024 - 2025
Augmented reality / Virtual reality,	
• Icat design & media college	2020 - 2023
BSc. ANIMATION	
• Ebenezer Mat.Hr.Sec.School, Chennai, India	2018 - 2020
Higher Secondary School Certificate	

PROJECTS

-
- **VR Architectural visualization**
 - Users can interact with architectural elements in real-time, enabling dynamic visualization of materials, lighting, and layout changes for better decision-making during the design process.
 - **VR Roller coaster shooting game**
 - A fast-paced virtual reality experience that combines the thrill of a roller coaster ride with interactive target shooting, offering immersive 3D environments, dynamic motion, and engaging arcade-style gameplay.
 - **AR Vuforia**
 - This AR experience uses Vuforia to scan a target image and overlay an animated 3D version of the same image in augmented reality, creating an interactive way to bring static visuals to life.
 - **AR Character movement with multiplayer**
 - Implements real-time character movement in an AR environment, allowing users to control and animate 3D avatars within their physical space using mobile.
 - **Architectural visualization**
 - This first-person visualization simulates a realistic car experience, allowing users to explore the space immersively while showcasing detailed architectural elements such as material textures, lighting, layouts, and spatial flow.
 - **3rd person view multiplayer shooting game with AI enemy**
 - Supports real-time multiplayer gameplay where players can team up or compete while facing waves of AI enemies, promoting strategic collaboration and competitive action.
 - **3D Models**
 - Designed and developed a variety of high-quality 3D models and characters using Blender and Autodesk Maya. Worked in modeling, texturing, rigging, and animating assets, AR/VR environments, and architectural visualizations.

TECHNICAL SKILLS

-
- **Languages:** C++ (Intermediate), Blueprints (Proficient), C# (Intermediate)
 - **Game Engines & AR/VR Platforms:** Unreal Engine, Unity, Vuforia, Meta Quest (VR), ARKit, ARCore.
 - **3D & Design Software:** Blender, Maya, Photoshop.
 - **Developer Tools:** Visual Studio, Git.
 - **AR/VR Development:** Experience with AR/VR hardware integration (Meta Quest, ARKit, ARCore), custom plugin integration (e.g., Lightship), Meta Quest Link/Development.
 - **3D Skills:** 3D Modeling, 3D Animation, Rigging.
 - **Game Development:** Multiplayer systems, Performance optimization, Testing and debugging.
 - **Other Skills:** Adaptability, Cross-platform asset optimization, Real-time rendering techniques.
